

WANGPRAI JULLAPECH

SOFTWARE ENGINEER

wangprai.jullapech@gmail.com | 084-543-1757 | LinkedIn: Wangprai Jullapech

SUMMARY

Computer Science graduate with a strong passion for Software Engineering and AI/ML. Experienced in developing scalable applications, NLP systems, and AI solutions through academic projects and internships. Skilled in building CRUD, real-time, and CRM systems. Eager to apply software engineering principles to real-world products and continuously grow as a developer.

PROJECTS

GitHub : <https://github.com/Wangprai>

DaikinThai Website

April 2025 - June 2025

Internship program

- Users want to be able to edit website pages themselves without needing to contact the IT department.
- Created a control panel so that administrators can edit information on the website themselves (image, text, etc.)
- This project will use PHP, Laravel and Bootstrap framework

IoT Meeting Room Reservation

June 2025 - October 2025

Co-operative Education program

- Help with the project for creating and designed and built an IoT-based meeting room reservation system with real-time occupancy detection.
- Tech stack: React, TypeScript, ElysiaJS, WebSocket.io and Ant Design

Document Understanding Transformers model

June 2025 - October 2025

Co-operative Education program (Internal project)

- This project involved document extraction in image to text responsibility in model training
- Using pretrained-model donut-base to fine-tune model for invoice
- Evaluation using matrix TED (Tree Edit Distance) : 99.74, Field Exact Match Accuracy: 98.64 and Overall Exact Match Accuracy: 92.28

WORK EXPERIENCE

Daikin Industries (Thailand) Ltd.

April 2025 - October 2025

Internship and Co-operative Education program

- Developed 1 project during internship period: DaikinThai website.
- Developed of 3 projects during Co-op program: Enterprise Risk Management (Backend), IOT Meeting Room Reservation (Frontend and Backend) and Document Understanding Transformer model (model improvement)

SKILLS

Languages	Frontend Frameworks	Backend Frameworks	Databases	Tools
• Python • Java (basic) • PHP • JavaScript	• React • Ant Design • Bootstrap	• Express (NodeJS) • ElysiaJS (Bun) • Laravel • FastAPI	• MySQL • Oracle • PostgreSQL	• GitHub • Docker (basic)

EDUCATION

Bachelor's Degree

June 2022 - December 2025

Khon Kaen University

- Department of Computer Science, College of Computing
- GPAX: 3.27 (Second class honor)

ACTIVITIES

- **Hackathon:** Participated in the Hackathon competition. The competition focused on the topic of "Rainfall and Dust in Thailand". Data from various sources will be collected and analyzed to find out what factors affect agricultural production.
- **SuperAI Engineer:** Participated in the SuperAI Engineer young innovator competition. The competition focused on the topic of "AI and innovation help communities". Created a web application has been created to summarize text from documents and help announce news in the E-sarn language.
